

Inspired by a classic: The men's toy COBRA LIBRE II re-tuned!

FUN FACTORY has fine-tuned the unique top-hit COBRA LIBRE! While the sporty design of the masturbator for men remains unchanged, the controls and the two powerful motors have been completely overhauled. COBRA LIBRE II is the new penis charmer of the highest class!

Bremen, June 2014 – A classic design with sporty details, 11 gears with intuitive automatic control that can be easily operated with one hand, and not one but two efficient electric motors. Most car owners can only dream of such details! Yet the new COBRA LIBRE II is more than a dream car. Men can now lean back and relax. The penis charmer from the house of FUN FACTORY pleases the very sensitive penis tip and brings users with every ride right to the finish line!

With the sleek-elegant design inspired by the legendary British sports car classic AC Cobra, the powerful COBRA LIBRE II is a highlight for all the senses. Two motors create 11 finely tuned vibration rhythms for a direct stimulation of the penis tip, which thanks to the long-lasting vibrations is like a long, breath-taking blow job.

Sometimes gentle, other times intense – the COBRA LIBRE II wins over drivers of any speed! The thrilling ride can be enjoyed without any hindrances because the rechargeable penis charmer doesn't have to be moved up and down by hand like other men's toys.

The inner lining of this power package convinces with its velvety, really soft medical grade silicone which wraps around the penis and pleasures it. With a little water and soap the inner chamber of this waterproof toy can be easily and completely cleaned.

Every man's dream on two wheels

The control unit on the COBRA LIBRE II has also been completely reworked. The three easy to reach buttons on the new PRESS FUN TO PLAY control unit ensures easy navigation even in the dark or underwater. Just as its name promises, both motors are started by pressing the FUN button, and with the two other buttons you can easily switch gears.

Special features included

The charge level indicator which is unique for sex toys guarantees that no one will ever run out of gas half-way to the finish line:

When the toy is connected via the magnetic charging point to the enclosed USB CHARGER, the number of illuminated buttons indicate the remaining power. If just one of the three buttons is lit up, then you need to refuel right way – if all three are lit up, then the next pit stop isn't needed for awhile.

Thanks to the comfortable USB CHARGER the COBRA LIBRE II can go on tours around the

world and never run out of gas. It can easily be loaded via the computer, tablet or a by using a country-specific plug adaptor also via the local electrical network.

Well thought out, right down to the last detail. The comfortable key lock prevents unwanted motor revving in your bags and the practical "quick stop" with the FUN button promises optimal insurance for unexpected braking.

**About FUN FACTORY:**

FUN FACTORY, one of Europe's largest manufacturers of aesthetic and stylish love toys, has its headquarters in Bremen, Germany. From the first sketch, to the design and the technical implementation right up to completion of the toy – the trends and latest hits in the industry are and remain “Made in Germany” and come directly from this Hanseatic city. It was here that FUN FACTORY was founded in 1996 by Dirk Bauer and Michael Pahl. In 2003, the first subsidiary of FUN FACTORY opened in the USA and in 2013 a branch in Spain. Today the company has over 120 employees and makes customers from all over the world happy with its products.
